

8. Project Demonstration

A CRM Application for TheChaiShop&Co

8.1 Demonstration Flow

- 1. Log in to the Salesforce environment.
- 2. Open the TheChaiShop&Co Lightning application.
- 3. Navigate to Customer, Employer and Enterprise objects.
- 4. Create or view records.
- 5. Use Online Order / Walk-In Order record types.
- 6. Enter products, items, payment mode and related information.
- 7. Observe formula-based Order Quantity and Total Bill fields.
- 8. Trigger/verify validation rules with appropriate test inputs.
- 9. Verify birthday email automation through the configured flow.
- 10. Open reports and dashboards to review sales information.

8.2 Demonstration Deliverables

Area	Demonstration Evidence
CRM Objects	Employer, Customer and Enterprise records
Layouts	Online Orders and Walk-In Orders
Automation	Formula fields, validation rules and birthday flow
Analytics	Customer Account Sales Report, Enterprise Account Sales Report
Dashboard	Customer Vs Enterprise Sales

8.3 Reports and Dashboard

The documented demonstration includes a Customer Account Sales Report, an Enterprise Account Sales Report, and a dashboard named “Customer Vs Enterprise Sales.”

8.4 Final Demonstration Note

The source document identifies the Salesforce Lightning interface, configured objects, automation, reports and dashboard as the main areas to demonstrate. Actual screenshots/results should be inserted here when available.
